

## Medieval Casket Solution

If you've made this puzzle box, and lost the plans, you may never get it open again without this solution. If you haven't made it, this solution might help you decide whether to make it. All eight of the lions' heads must be moved before the lid can be opened.

Hold the box so that the hinges are at the back, and looking down on the top, this is the correct sequence to move the lions' heads:

To open the box:

Move the front left and right sliders in to the middle.  
 Pull the left and right sliders forward.  
 Move the back left and right sliders outwards.  
 Push the back lock downwards.  
 Move the back left and right sliders in to middle.  
 Push the left and right sliders backwards.  
 Move the front left and right sliders outwards.  
 Push the front lock upwards: this will release the lid.  
 14 moves altogether.

...and open the lid.
