

Welcome to Paper Shipwright

Paper Shipwright is a publisher of scale card models. The models are highly detailed and aimed at serious modellers.

Models available in the ship range include vessels from around the world and concentrate on the period from the early days of steam-powered ships to around the end of the First World War. With an emphasis on smaller ships, the range includes early ironclads, monitors and other vessels - both civil and naval subjects are included. A new range of lighthouses has recently been launched.

The models are all printed in full colour on light card and include a brief history of the subject and full instructions. All are available in 1:250 scale, some also in 1:160 scale.

Etched metal parts are available for some models – please enquire for a list of available sets.

Watch out for further announcements on the Paper Shipwright website and note you can register on-line to receive email notification of new releases.

Paper Shipwright is the trading name of David Hathaway.
