About the house

If more than about 6Kw of electricity is used the switch will trip out.

To reset simply flick the trip switch up - located under the calendar to the right hand side of the front door.

Should you need to dry clothes use the frame located in the cellar.

There is also an airbed, body board, picnic table and washing machine located in the cellar should you wish to use them.

Using the washing machine

Should you wish to use the washing machine, first make sure it's plugged in.

There is a tap on the inside right of the cellar door. Ensure this is turned on.

Load the machine. Put liquid in the draw.

Set the desired temperature.

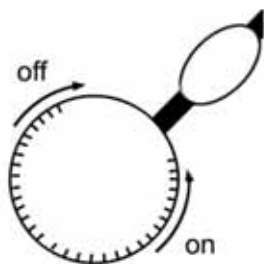

Turn the wheel on the front to the desired program and then pull it out (I think!).

Please make sure you turn the water tap off when you've finished using the machine.

Please also be careful that if you use the machine not to overload it

Many thanks.

Using the gas heater

- Push down the ignition button and one of the right hand buttons a few times to ignite the pilot light.
- To turn the heater off simply turn the wheel on the neck of the bottle to the off position
