

Well, here we are the season of good will. On Friday 17Dec my granddaughter,s arrived home from school with a letter addressed to there parents announcing that a decision had been made to demolish the Primary School ! Now as a Stockton Heath Councillor in these days when everybody has the right to know and the fact the Parish Council had only the previous Tuesday granted permission to take down a tree and part of a wall to install extra portable class rooms you would have thought we would have been told about this decision. Instead i have been inundated with calls from anxious parents wanting to know what is going on? To announce this in such a way especially the day the children broke up for xmas was most insensitive. We now have to wait till the new year before anybody knows whats going on.

Cllr.Patrick Mullee Stockton Heath Parish Council.

Patrick

I think that as the letter says, there will be a time scale so the temp. class rooms and cutting down tree are part of this time scale where the temp c/rooms will be used while parts of the school in turn are demolished. I have rung Petter Briggs and he like me thinks that as there is no other land to build on in St Heath and that the above is the reason for the letter but he feels as I do that the Parish Council should have been told and that at least Maurice Leslie should have said about this on Tues when we talked and approved the removal of a tree and the building of temp c/rooms. He must have known as he is a governor of that school and i for one will not be pleased if he knew and did not tell us on Tues. after the press left.!

Graham
