Wednesday 1st November 2006

Dear Parents and Carers

The Governors are aware of information which has become available on the internet which challenges our new building scheme. This has been developed by those against the provision of a new school here.

We would emphasise that this has no support from the school nor does it reflect the views or opinions of the school and its Governors.

We firmly believe that the best possible option available is to replace the current building with one which will meet our aspirational needs and continue to provide high quality education in Stockton Heath for current and future generations.

Studies to consider options for development were commissioned and these reports offer balanced independent advice. We feel that these reports should be viewed in their entirety and can be accessed via the official school website; www.stocktonheath.org.

The decision to replace the building with a new build has been made by the Executive Committee of the Borough Council. You should by now have received a letter setting out a provisional timetable including that for the submission of revised plans to the development control committee. Further delays against this timetable will be detrimental to the desired outcome.

Despite current difficulties, we continue to celebrate the achievements of our pupils and recognise the huge dedication and commitment of the staff.

Your children deserve the very best that can be offered within the funding available and we look forward to receiving your support in achieving our shared vision.

Yours sincerely

The Governing Body

WARRINGTON BOROUGH COUNCIL
